¹ May include volunteers.

² Includes paid and unpaid family workers, and may include owners of incorporated businesses, or members of partnerships.

³ Persons identified as Hispanic may be of any race. The individual racial categories shown exclude data for Hispanics.

⁴ May include fatalities that occurred in structures that do not meet the definition of permit required confined spaces as defined by Occupational Safety and Health Administration regulations. Excludes fatalities from trench cave-ins and from being caught in collapsing materials.

⁵ The primary source of injury identifies the object, substance, or exposure that directly produced or inflicted the injury. For transportation incidents, the source identifies the vehicle in which the deceased was an occupant.

⁶ The secondary source of injury, if any, identifies the object, substance, or person that generated the source of injury or that contributed to the event or exposure. For vehicle collisions, the deceased's vehicle is the primary source and the other object (truck, road, divider, etc.) is the secondary source. For most homicides, the "bullet" is the primary source and the "perpetrator" is the secondary source. The category "Robber" was instituted beginning with 1997 data, which was partial year reporting.

⁷ Includes walking, sitting, running, and climbing ladders or stairs.

⁸ The road construction location category was implemented in 1995.

⁹ Primarily includes outdoor areas such as bodies of water, woods, noncultivated fields, and parking lots.

¹⁰ Buildings and adjacent grounds used by the general public or a particular group, such as hotels, restaurants, stores, office buildings, courthouses, and schools.

¹¹ Private residence fatalities primarily occurred to repair or maintenance workers, police while on duty, firefighters, or residential construction workers.

¹² The residential construction location category was implemented in 1998.

¹³ Includes children's home, dormitory, hospital, jail, nursing home, and reform school.

¹⁴ Beginning with the 2003 reference year, data for industry are classified according to the North American Industry Classification System (NAICS). From 1992 to 2002, data were classified according to the U.S. Standard Industrial Classification (SIC) system. CFOI considers this change to be a break in series.

¹⁵ Includes fatalities to workers employed by governmental organizations regardless of industry.

NOTE: Counts for 2003 are preliminary. Totals for major categories may include subcategories not shown separately. Dashes indicate no data reported or data that do not meet publication criteria. N.e.c. means "not elsewhere classified."
