<sup>1</sup> Persons identified as Hispanic may be of any race.

<sup>2</sup> May include volunteers and other workers receiving compensation.

<sup>3</sup> Includes paid and unpaid family workers, and may include owners of incorporated businesses, or members of partnerships.

<sup>4</sup> Based on the 1992 BLS Occupational Injury and Illness Classification Manual.

<sup>5</sup> May include fatalities that occurred in structures that do not meet the definition of permit required confined spaces as defined by Occupational Safety and Health Administration regulations. Excludes fatalities from trench cave-ins and from being caught in collapsing materials.

<sup>6</sup> The primary source of injury identifies the object, substance, or exposure that directly produced or inflicted the injury. For transportation incidents, the source identifies the vehicle in which the deceased was an occupant.

<sup>7</sup> The secondary source of injury, if any, identifies the object, substance, or person that generated the source of injury or that contributed to the event or exposure. For vehicle collisions, the deceased's vehicle is the primary source and the other object (truck, road, divider, etc.) is the secondary source. For most homicides, the "bullet" is the primary source and the "perpetrator" is the secondary source. The category "Robber" was instituted beginning with 1997 data, which was partial year reporting.

<sup>8</sup> Includes walking, sitting, running, and climbing ladders or stairs.

<sup>9</sup> From 1992 to 2002, CFOI defined occupation using the 1990 Census Bureau occupation codes. Starting with 2003 data, CFOI defines occupation using the Standard Occupational Classification (SOC) system. Given the differences between these two classification systems, CFOI considers 2003 to be a break in series for occupation. For data on occupation prior to 2003, see the 2002 CFOI News Release.

<sup>10</sup> From 1992 to 2002, CFOI defined industry using the 1987 Standard Industrial Classification (SIC) system. Starting with 2003 data, CFOI defines industry using the 2002 North American Industry Classification System (NAICS). Given the differences between these two classification systems, CFOI considers 2003 to be a break in series for industry. For data on industry prior to 2003, see the 2002 CFOI News Release.

<sup>11</sup> Includes fatalities at all establishments categorized as Mining (Sector 21) in the North American Industry Classification System, 2002, including establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in Oil and Gas Extraction.

<sup>12</sup> Includes fatalities to workers employed by governmental organizations regardless of industry.

NOTE: Totals for 2003 are preliminary. Totals for major categories may include subcategories not shown separately. Dashes indicate no data reported or data that do not meet publication criteria. n.e.c. means "not elsewhere classified." There were 9 fatalities for which there was insufficient information to determine a specific industry classification, though a distinction between private and government was made for each.
